

BLUE GIANT®

AFTERMARKET SOLUTIONS

Save on operating costs and improve dock environment with Blue Giant protective solutions

Seal the gaps in and around the loading dock and save thousands of dollars in energy costs per year.

Draft Protection Where You Need It Most

When weather seals and draft pads are installed in exposed areas of your loading dock door and pit, facility heating and cooling costs are reduced, resulting in potential energy savings of up to \$1,000 per loading bay per year.

Clean Pit

Blue Giant roller curtains, weather seals, and draft pads keep dirt, debris, and pests out of the pit area. These sealing solutions are made from high-grade industrial materials and prevent outside contaminants from compromising facility cleanliness.

Quick ROI

Blue Giant protective solutions can provide a complete ROI in as little as three months, depending on climate and number of seals and pads installed.

Qualify for Energy Rebates

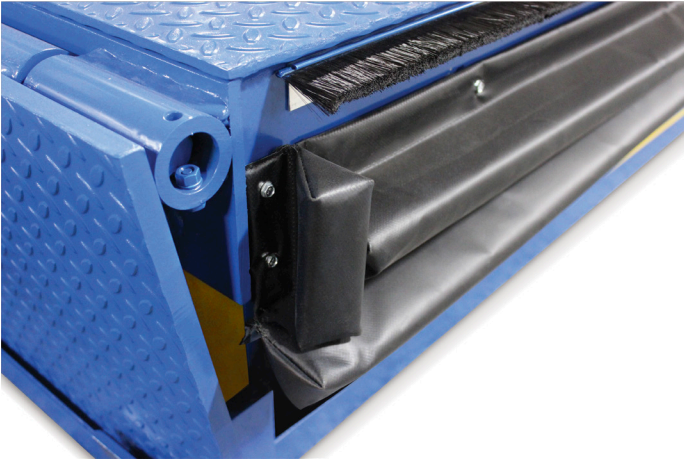

Many federal, state / provincial, and local programs offer rebates and other incentives for projects and buildings that demonstrate energy-efficiency. Incentives include tax credits, developer grants, and low-interest loans.

Energy Seals

Energy Seals

Vinyl Foam Weather Seal

Part # 720-ESP-6 (6' Long)
Part # 720-ESP-8 (8' Long)
Part # 720-ESP-10 (10' Long)

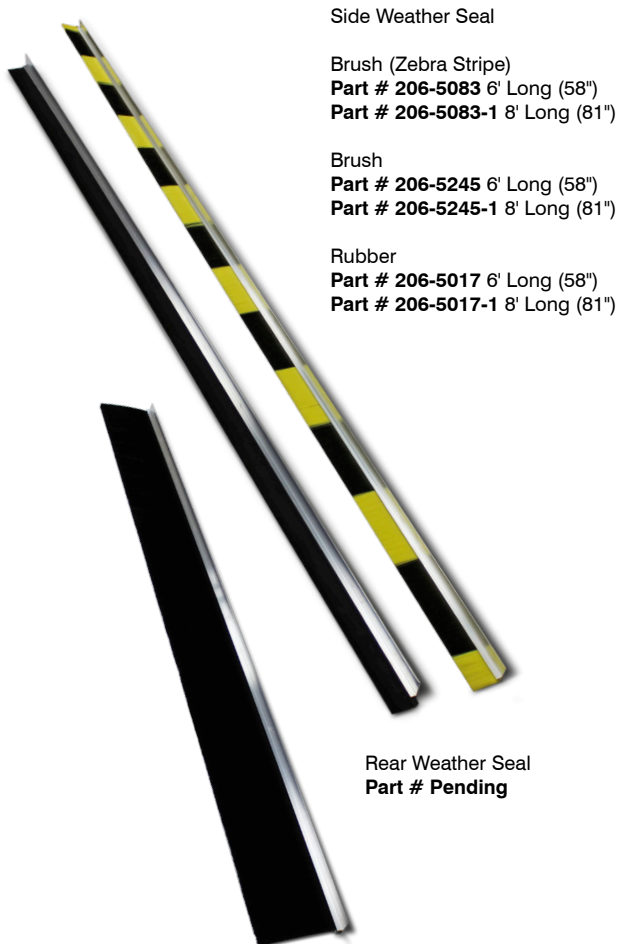

Blue Giant Vinyl Foam Weather Seals keep the pit area clean and prevent conditioned air from escaping. Secure foam padding closes off gaps between the dock leveler and the pit walls, limiting heat and energy transfer at all stages of the loading and unloading process.

Features

- Made of triangular open cell foam covered in reinforced vinyl
- Secondary seal assembly ensures protection when the dock leveler is in use
- Rear hinge assembly flexes when the dock leveler rises and lowers, preserving the seal

Weather Seal Kits

Side Weather Seal

Brush (Zebra Stripe)
Part # 206-5083 6' Long (58")
Part # 206-5083-1 8' Long (81")

Brush
Part # 206-5245 6' Long (58")
Part # 206-5245-1 8' Long (81")

Rubber
Part # 206-5017 6' Long (58")
Part # 206-5017-1 8' Long (81")

Rear Weather Seal
Part # Pending

Blue Giant Weather Seal Kits minimize energy loss at the loading dock by sealing the gaps at the back and / or sides of pit style dock levelers. These barriers, which are made from high-quality brush or rubber, also keep debris, pests, and other outside contaminants out of the pit area.

Side Weather Seals

Gaps of up to 1" (25mm) can exist between the pit wall and the dock leveler sides. Blue Giant Side Weather Seal Kits provide a simple and effective barrier, keeping energy costs down and supporting a clean pit.

Features

- Kit includes two aluminum retainers, two weather seals (brush or rubber) and screws (quantity is based on set)
- Weather seals available in 6' or 8' lengths
- Brush style available in black or safety striping

Rear Weather Seals

Don't let gaps between the rear of the dock leveler and the pit wall push up energy consumption in your facility. Blue Giant Rear Weather Seal Kits restrict debris entry and limit air loss, keeping dock operations clean and sustainable.

Features

- Kit includes one aluminum retainer, one weather seal (brush or rubber) and screws (quantity is based on set)
- Available in lengths of 52" (1321mm), 64" (1626mm), 70" (1778mm) and 75" (1905mm)
- Easy to install and maintain

Roller Curtain Assembly

Part # 839-080-2 6' 6" Roller Curtain Assembly (76 3/4" Wide)

Part # 839-080-1 72" Roller Curtain Assembly (70 3/4" Wide)

Part # 839-023 83" Roller Curtain Assembly (Wide)

Keep energy costs down by installing a Blue Giant Roller Curtain on all pit style levelers. The secure vinyl barrier keeps drafts from affecting loading dock temperatures. Dirt, rain, and snow, are also deflected, resulting in less time spent on pit maintenance.

Features

- Spring-mounted roller tube maintains optimum fabric tension
- 22oz yellow vinyl
- Includes mounting brackets and grommets on bottom edge

Vertical Dock Leveler Draft Pad

Part # 23-013158

Vertical storing dock levelers are recommended for climate-sensitive applications, and the Blue Giant Vertical Dock Leveler Draft Pad keeps temperatures stable during dock leveler use.

By sealing the gap between the deployed unit and the pit floor, a clean pit is also maintained.

Features

- Made from 22oz vinyl
- Secure attachment apparatus
- Custom sizes available

Bottom Door Draft Seal

Blue Giant Bottom Door Draft Seals keep internal temperatures consistent by closing gaps created by uneven surfaces between the dock leveler and the overhead door. Easy to install and maintain, these door seals can save hundreds of dollars per year in energy costs.

Features

- Available in dense bristle brush or industrial-grade vinyl
- Vinyl seals available in lengths of up to 12'
- Brush seals come in bristle lengths of 1 1/2" (38mm), 2" (51mm) and 3" (76mm)

Leveler Seal Wedges

Part # 997-WEDGES

Blue Giant Leveler Wedges eliminate extra gaps in the loading dock area. Their compact and flexible size seals extra openings without interfering with dock operations, providing additional protection against energy loss.

Features

- Closed cell foam wedges
- Made from industrial-grade vinyl
- Custom sizes available
